SUMMARY

Frontend React Developer with 2.8 years hands-on experience on building scalable, enterprise-grade web and mobile applications using React js, TypeScript, and React Native. Strong understanding of component-based architecture, modern React Hooks, state management strategies, and API-driven UI development. Experienced in working on financial and accounting domains with a focus on performance, maintainability, and clean UI/UX. Comfortable collaborating in Agile teams and contributing to production-ready applications.

EXPERIENCE

Junior Software Developer   Apr '23 — Present
B2A Technologies Pvt Ltd   Jaysingpur, India
- Developing and maintaining scalable React + TypeScript applications for accounting and society management platforms.
- Building reusable, modular UI components using functional components and modern React Hooks.
- Managing local, global, and server state using React Hooks, Context API, and SWR.
- Integrating REST APIs using Axios and SWR with caching, revalidation, and optimized server-state handling.
- Implementing responsive UI using Material UI and Bootstrap for cross-device compatibility.
- Implemented responsive layouts using Material UI and Bootstrap to ensure cross-device compatibility.
- Applying performance optimizations including memoization (useMemo, useCallback), lazy loading, and virtualized rendering for large datasets.
- Collaborating with backend developers, designers, and QA teams in Agile methodology to deliver high-quality features.
- Contributing to mobile development using React Native and assisting in Android & iOS deployments.

PROJECTS

DhanMan – Accounting & Society Management Platform (Web)   Jul '23 — Present
- Developed a large-scale React + TypeScript web application for accounting and society management.
- Implemented modules including invoice creation, ledger management, financial reports, dashboards, and dynamic data tables.
- Managed global configuration and authentication using Context API.
- Implemented optimized server-state management using SWR (caching, revalidation, optimistic updates).
- Built reusable UI components aligned with shared design systems and theming standards.
- Improved performance using memoization, lazy loading, and efficient rendering techniques.

DhanMan – Society Management Mobile Application (React Native), B2A Technologies   Sep '25 — Present
- Designed and developed a React Native mobile application for gate and visitor management.
- Implemented features including resident verification, visitor tracking, and gate pass generation.
- Integrated REST APIs and handled application state for seamless user workflows.
- Ensured cross-platform compatibility and successfully deployed on Android and iOS.

SKILLS

Programming Languages   JavaScript (ES6+), TypeScript
Frontend Technologies   React Js, React Native, HTML, CSS3, Material UI, Bootstrap
State Management   React Hooks, Context API, Formik, Custom Hooks
API & Data Handling   REST APIs, Axios, SWR, Error & Loading State Handling
Databases   PostgreSQL, MySQL
Tools & Environments   Git, GitHub, npm, Grafana, Jenkins, Agile Methodology

EDUCATION

Post Graduate Diploma in Advanced Computing, CDAC   Sep '22
                                                              Bangalore, India

Bachelor of Engineering in Civil Engineering, Shivaji University   Jun '18
                                                              Kolhapur, India
